

Cloud Assessment and Roadmap

Huntzinger will perform a comprehensive assessment and develop a roadmap to guide healthcare organizations during the transition to cloud-based services. By engaging and customizing our tools and templates, Huntzinger's cloud strategy includes technical, application and administrative requirements that will define governance, decision criteria as well as the security and cost impact to your organization.

Why Cloud?

- Modernize infrastructure for computing offerings
- Avoid hardware procurement delays
- Escape big outlays in capital expense
- Retire technical debt faster
- Build additional resiliency in computing offerings
- Improve information security posture and compliance
- Foster the purge of legacy applications

Our Approach

The assessment has two phases which are done in parallel, Cloud Foundation and Application Readiness, followed by execution:
